

# Kratos Aerial Target Services

---

As the complexities of weapon systems grow, so too does the need to realistically validate their effectiveness and properly train the users. The purchase of aerial targets represents a significant investment in man and machine. As an alternative, Kratos offers customized aerial target services. This affordable pay-per-use service option allows Kratos to tailor missions to the user's unique requirements.

## Services Offered

### **Logistics**

You don't need to worry about logistics planning. Whether it's on your own range, or on one of our partner ranges, Kratos will handle everything including delivery, set-up, and operation of the aerial target system.

### **Mission Planning**

Kratos' experienced professionals will work with you to ensure that each target presentation is on-time, safe, and meets your operational requirements.

### **Flight Operations**

Kratos' talented team will coordinate everything from pre-launch planning, to post-flight recovery of the aerial targets, leaving you free to focus on other priorities.

### **Data Reporting**

An aerial target presentation is only as good as the data that is collected. Kratos offers comprehensive post-flight analysis, including Miss Distance Indicator (MDI), so you can learn from every shot taken during a mission.

### **System Maintenance**

You don't pay the maintenance costs. Kratos owns the aerial target system, and is responsible for its maintenance.

### **Kratos Divisions**

- Defense & Rocket Support
- Technology & Training
- Microwave Electronics
- Modular Systems
- Public Safety & Security
- Unmanned Systems

### **Kratos Unmanned Aerial Systems**
